CINC INFO

M/R: 1. By radio CX 63539 FEC queried DA on JCS position on attacking Soviet targets in CC in event of war with Russia. Rad was sent in response to a request from FEAF for clarification on this matter. DA reply, W93796, refers to comments they propose to make to JCS on FEOP 1-50 and requests CINCFE's views on their proposals.

a. With ref to FEC query DA proposes that no opns be conducted against targets in CC until status CC vis-a-vis U.S. is clarified. DA adds, policy would not prevent action against either Soviet armed forces or facilities which are in active use by such forces and whose existence poses a direct major threat to security of FEC, regardless of location.

b. DA makes a second proposal, not related to FEC query. In substance, this proposal is to suspend action, until the completion of Korean hostilities, on determining the shortages in the materials which are needed by FEC to support FEOP 1-50.

2. Coordination on 1b above: G-4 (Col N M Winn).
